Education

Polytechnic University of the Philippines Sta. Mesa, Manila
Diploma in Computer Engineering Technology 2023 - Present
Specializing in Machine Learning
1st Year 1st Semester – Dean's Lister
1st Year 2nd Semester – President's Lister

University of Perpetual Help System DALTA – Molino Campus Bacoor, Cavite
Science, Technology, Engineering, and Mathematics (STEM) 2021 - 2023
With Honors from 2021-2023

Experience

Etiqa Life & General Assurance Philippines, Inc Makati, National Capital Region
Data Analyst Intern July 2025 – September 2025

- Executed comprehensive data cleaning and validation procedure using Microsoft Excel formulas to identify duplicates and ensure high-quality data integrity.
- Optimized data management workflows by structuring and categorizing complex batch files, significantly improving data retrieval speeds and archival organization.
- Conducted data quality assurance and verification protocols to cross-validate electronic datasets and hard copy documents, ensuring high-fidelity records.
- Collaborated with internal teams to streamline high-volume data processing pipelines, balancing operational speed with rigorous accuracy requirements.

Leadership & Activities

Reserve Officer's Training Corps (PUP-ROTC) Sta. Mesa, Manila
S3 – Operations Officer November 2023 – June 2024

- Served as a 1st year student (Junior Escort).
- Supervised on planning and proposal writing of ROTC events under Corps of Sponsors and Escorts (COSE).
- Assigned tasks to co-juniors before and during PUP-ROTC events.

Head Corps Escort November 2024 – June 2025

- Led the Corps of Sponsors and Escorts in organizing and executing ceremonial roles during the ROTC events and university functions.
- Orchestrated logistical coordination between military officers and university administrators to ensure seamless execution of high-profile protocols.
- Trained junior sponsors and escorts in protocols, proper conduct, and responsibilities, fostering a culture of discipline and leadership.

Projects

Crime Detection System
Full Stack Developer

- Integrated a pre-trained YOLOv8 model into a web application to enable real-time object and threat recognition.
- Engineered the backend architecture using Python (Flask) to process video streams and trigger alerts.
- Developed a responsive user interface using React for live monitoring.
- Implemented an AI-powered chatbot assistant using the Gemini API to provide real-time user support and system navigation

Budget Tracker Website

- Designed a personal finance management website using Python and PostgreSQL for secure data storage.
- Implemented complex SQL queries to generate spending reports and visualize budget constraints.
- Built a responsive React interface enabling seamless financial tracking and budget management across devices
- Deployed the application on a public server with real-time synchronization for multi-device access

Skills & Interests

Technical: Python (Flask, NumPy, Pandas), SQL (PostgreSQL, MySQL), Web Development (HTML, CSS), Version Control (Git/GitHub)
Hardware & Tools: Arduino, ESP32, Circuit Design & Prototyping, IoT Integration, Packet Tracer
Professional: Quick Learner, Adaptability, Team Oriented, Communication, Time Management
Language: English (Proficient), Filipino (Native)

Certifications

Computer Systems Servicing NC II	TESDA - September 2024
Introduction to Python Programming	Coursera – November 2025
Mechatronics Servicing NC II	TESDA - February 2026
Python Data Associate	DataCamp – February 2026
